CAMPBELL, THE ORCHARD CITY OF THE FAMOUS SANTA CLARA VALLEY

Campbell Press

FOR THE BEST INTERESTS OF CAMPBELL AND COMMUNITY

VOL. 35, NO. 31 CAMPBELL, SANTA CLARACOUNTY, CALIFORNIA. THURSDAY, JAN. 31, 1929

Pertinent Paragraphs

The details of a certain "entertainment" of several weeks ago have since that time been crying for comment, so this week we are taking the opportnity to remark on the recent "ladies' night" as tendered by Campbell Kiwanians to their wives. The program centered, naturally, around food. We understand that a very nice dinner was served. Good of th club members, don't you think, to take their wives out of the monotony of the kitchen, if only for the evening? Sure. But the joker in a very cold deck is this—before gathering at the community hall for the dinner, these same good ladies spent a goodly part of the afternoonin their kitchens preparing the "treat." Big-hearted Kiwanians!

We would like to see the local service club stage a "ladies' night" entertainment to which we could point with pride as proof of the fact that Campbell Kiwanians know how to "put it on." If the ladies are to be entertained—and they should be—entertain them right. Embelished with the choicest Billingsgate there recently fell from the lips of a bus driver—in substance—these words: "Campbellites count only five dimes to the dollar." Not so good—and a reputation which thrives on "entertainments' for the ladies to which they bring and serve their own food.

Campbell's big day is drawing near. Feb. 22 will find a good many of the county's pioneers gathered here for the celebration in their honor.. One of the finest ways to let them know you are aware of them—to make the day one of gladness to them—is to be present at the celebration—and see that your neighbor gets here too. "Word of mouth" advertising is very effective. Sell the idea wherever you go. It will do much to insure a good crowd.

That's all.

Celebrate Silver Wedding Day

Mr. and Mrs. J. R. Lynden were surprised last Thursday evening at their home on East Campbell avenue, by a group of friends who came to join them in celebrating their siver wedding anniversary.

The hours passed pleasantly with music, visiting, and refreshments and the expression of congratulations.

Women's Auxilary Re-elects Officers

The Women's Auxiliary of Orchard City Grange met at the home of Mrs. A. C. Kiesling last week and re-elected Mrs. Harry Barnes, president and Mrs. Husted, secretary.

The auxiliary has been divided into six groups representing the several districts centering in Campbell. Each of these circles will meet bimonthly and work for the building fund of the Grange.

CAMPBELL ALUMNI TO CLASH WITH ELLERY ARMS SAT.

Next Saturday night Campbell basket ball fans are going to have the opportunity to see two fast and furious games when the Campbell alumni teams meet the crack Ellery Arms quitets from San Francisco.

Last year the Ellery Arms unlimted won the Bay champonship and they have the same outfit this year.

The Campbell fons are not supporting the teams as they should as they are having a hard time to make expenses. Saturdays games wll be worth anyones tme and money to see, so get behnd the alumni and help them defi at the best team San Francisco can send down.

Last week the alumni won both games from the Sequora Athletic club, the "145's" wining 34 to 18 with Captain Hmmel making fourteen points. Kalas and C. Nelson figured largely in the unlimited, that team wining 28 17.

Don't forget the game this coming Saturday, Feb. 2.

GRAMMAR P. T. A. SERVES EXCELLENT DINNER TO C OF C

The annual Chamber of Commerc banquet was thoroughly enjoyed Friday evening when about 70 boosters partook of the dinner that extended the fame of the Grammar P. T. A. workers.

The tables were very prettily decorated by a group in charge of Mrs. W. I. Merrill and the favors were the work of the little hands of the opportunity class under the efficient supervision of Mrs. Bernice Lloyd Saveker.

The chairman expressed for the Chamber thesincere thanks to those little enthusiasts, and also to the ladies who served the banquet.

Campbell's beloved soprano artiste, Miss Helen Kalas, sang a delightful group of solos accompanied by her friend Miss Sara Knight of Seattle. Miss Kalas chose as her songs: Phyllis Hath Such Charming Graces," "Iris" by Ware and "Where the Bee Sucks There Lurk I" by Shakespeare.

President Harry Smith gave a short resume of the accomplishments of the Chamber, its members, and allied assocatonis during the year 1928.

Among the outstanding signs of progress in Campbell, were the expansion of aur canneries: the erection of the steal pressure tank and modern filtration plant by the Campbell Water Co.; the paving of Central and Railroad avenues; the burning of the mortgage on the Community hall and library and the opening of the Hedegard subdivision. He then introduced the speaker of the evening, the Rev. C. J. Gauld, paster of First Congregational church of San Jose, who gave an interesting talk on 'Community Co-operation.

In part hesaid that every community is made up of many kinds of folks and each community is much like its neighbors. Each has its porcupine people, chip-on-the-shoulder class: its para-products of others; its super-sitees living on the work and minded, better-than-others class; and the predominant lend-the hand group that leavens the rest hand group that leavens the rest. The service club has done much in America to develope and inspire the last named class, he said.

Another Victim of the Racketeer

GRANGE NOTES

Orchard City grange met in regular session Jan. 22. It was largely a business meetng and ithere was quite a full attendance. The new officers were in their chairs with S. N. Hedegard as master. Mr. Hedegard made an addres in which he presented som e of the things to be worked for the coming year and asked for the assistance and co-operation of all the members.

The Grange orchestra played three numbers which were a great improvement over some of that which is heard over the radio.

A report of the Grange, Incorporated, on the building fund was read, showing a substantial sum of money already collected, and several speakers thought they would soon be able to start buildin g operations.

The next meeting will be Feb. 12.

Reception Planned For Mrs. Hutchins

Mrs. Carrie Hutchins of San Francisco, president of the Rebekah assembly, will visit Ada Rebekah lodge Tuesday, Feb. 5.

A reception in her honor will be held after the regular meeting. Mrs. Helen Johnson, San Jose, Mrs. Emma Main, Mrs. Martha Phillips and Mrs. John Lancaster were the committee social session.
appointed to arrange for the

Mrs. Alice Hutchins will spend Tuesday and Wednesday of next week in Campbell with Mrs. P. H. Dunlap.

Mrs. D. H. Cramer and Mrs. George W. Page represented the Country Womens club and Mrs. George Burow the Punidita Circle, at the County Federation of Women's Clubs at Los Gatos Friday.

Mrs. L. L. Merrill is convalescing from a recent operation at the home of her sister, Mrs. W. G. McCaughey.

Miss Joyce Robson who is one of the faculty of the Coalinga high school, was home over the past week-end.

E. R. Kennedy is suffering from an attack of the flu.

Friends of Mrs. W. I. Merril extend sympathy in the loss of her mother, whose death occurred last week at her home in Maine.

LOUISE FIEDELDY

Miss Louise Fiedeldy who was taken to the O'Connor Sanitarium last Thursday following an oppoplectic stroke, passed away Monday.

Funeral services were conducted from the Melvin Funeral Parlors in Los Gatos Wednesday by the Lutheran minister from Burlingame and intermint was at Cypress Lawn.

Miss Fiedeldey had made her home here for a number of years with Mrs. Julia Sharpless and for some time was in charge of the Christian Science reading rooms when they were located in the old bank building.

Duff-Baugh

The announcement of the marriage of Miss Helen Mary Duff of Los Angeles and Edward Bernard Baugh of Campbel on Wednesday, Jan. 23, was a surprise to their many friends.

They made application for their license at Fairfield, Solano county Satusday, and were marriad Wednesday morning just after midnight of Tuesday. The ceromony was performed by Rev. Hubert Doren of Hughson, a friend of Miss Duff, at the home of Lewis Merril, chief deputy county clerk.

The bride is the preacher of the trio of Duff sisters who held evangelistic services here last November.

Mr. Baugh has made his home in Campbell for a number of years coming here with his parents where the Mission hatchery tract was first opened. More recently he and his mother have lived on north second street. He is an earnest worker in the Methodist church and a leader of several of its activities

Mr. Baugh has been connected with banking institutions in San Jose and at present is an employee of the Bank of Italy.

The future plans of the young people have not been made known.

A realty exchange was made last week thru two San Jose real estate firms in which the residence property of Mr. and Mrs. L. E. Eddlemon on north second street was transferred to Ray Heiks of San Jose for a ninety-one acre and pear orchard at Watsonville. This home is one of the nicer modern houses in Campbell built about four years ago. J. H. Campbell bought the vacant lot south of the house.

Miss Sadie Maxon and her nephew Harold Maxon went to Courtland Monday where they assisted Mrs. Walter Stanford in packing and moving to Oakland, where Mr. Stanford is now located.

FOUNDERS' DAY TO BE OBSERVED BY GRAMMAR PTA

TheP. T. A. of the Grammar School will celebrate Founders Day at itc meeting Tuesday, Feb. 5, begining at 2:15 in the Kindergarten room.

Mrs. M. C. Allan, Founders Day chairman will be in charge of the program. All past presidents of the local associaiation. the sixth president and council president will be guests of honor. president will be guests of honor, and Mrs. Paul Alexander of Los Angeles will be the speaker.

All members are urged to be present and anyone interested in child welfare is cordially invited.

A ten cent silver tea will be served at the conclusion of the meeting.

Fellowship Supper Is Well Attended

The fortnightly supper served by the ladies of the Congregational guild Tuesday in the interest of church fellowship was a marked success, over a hundred being present, to whom a delicious supper was served.

The talk which Rev. Charles L. Kloss, paster of the San Mateo Congregatioal church, gave on "Mussolini and the with interest and humor and Italian Situation" was replete concluded with a constructive thought for the future of democracy in America.

Rev. Kloss visits Europe every summer and has studied the political situation carefully on the home soil.

Witness Stanford, California Game

Mr. and Mrs. Ben Austin, Mr. and Mrs. T. A. Robinson and Mrs. C. C. Brynes motored to Oakland Saturday to witness the Berkeley-Stanford basketball game at the Oakland Auditorium. In addition they had the pleasure of a visit with Campbell students at the U. C., William Robinson, Thomas Byrnes and Lucius Buck.

Mrs. L. F. Shaw and Mrs. May Beardsley of Johnson avenue enjoyed a visit Sunday from Mrs. Alice Fleming of Willow Glen and Mr. and Mrs. Beardsly of Oakland.

Warren Eddlemon is nursing toboggan spill while coasting in Yosemite over the week-end. The real catastrophe was the loss of several front teeth.

W. T. Alexander has recovered from his recent illness sufficiently to be up and around the house several hours each day.

Mrs. J. W. Lancaster suffered a slight stroke Saturday which affected her left side. She is resting as well as may be and hopes are entertained for a complete recovery in the near future.

The Rev. J. H. Bennett is to address the Ad club at their luncheon meeting Monday, Feb 4, at th Sainte Claire hotel in Son Jose.

Found—A child's coat, blue trimmed with fur. Inquire at the high school.

OLD SETTLERS' DAY PLANS NEAR FINISH

Plans are rapidly being completed for the annual Old Settlers Day celibration of Santa Clara county at Campbell Feb. 22.

The speaker and program committees have their duties well in handat this early date and promise a day of real entertainment and pleasure.

Those appointed on the publicity committee are, T. A. Cutting, G. E. Farley, Mrs. C. H. Whitman, Mrs. J. F. Wehmeyer and already the good word is being spread the land.

The reception com... been divided in two ... and honorary, the re... resting on the active co... men, Mr. and Mrs. C. B. ... acle, Mr. and Mrs. C. H. Wh... man, Mr. and Mrs. E. R. Kennedy, Mesdames G. E. Farley, Ethel Davis, J. D. Blaine, C. W Sutter and Miss Mary Fablinger

The honorary reception committee members are: Mesdames Lena Rodeck, L F. Shaw, Alice Smith, Mary White, Elizabeth Duncan, Emily Duncan, F. O. Putnam; Mesrs. and Mesdames J. H. Campbell, R. W. Kennedy, Charles Berry, B. O. Curry, A. E. Barker, C. L. Watson, G. W. Page, G. E. Hyde, J. C. Ainsley, F. M. Righter, G. S. Robson, J. F. Wehmeyer, George Whitney, A. C. Keesling, H. G. Keesling, E. K. Clendening, J. B. Gard, R. B. Payne, F. H. Cutting, A. B. Townsend; Messrs. Josiph Bohnett, N. G. Finley, W. C. Cutting and J. H. Neff.

Hall and decoration committee: Messrs. and Mesdames, S. N. Hdegard I. R. Abbott, R. E. Noddin and A. Ferro.

DR. KAPP BOOSTS SERVICE CLUBS

One with imagination was served with a real treat that dealt with real and imaginary ideas as he listened to Dr. Kapp uncover some of the former imaginings of "rattle brains." The Doctor told of numerous great inventions and discoveries that were the outgrowths of imagination of small beginings, in his talk to Kiwanians Tuesday.

The rapid strides in the sciences are already beyond the most optomistic imaginings of yesterday with the ultimate end far beyond the minds of today, according to Dr. Kapp.

He stated that one of the greatest movements with untold benefits and unlimited possibilities was the service club idea, a product of imagination doing a great good in developing brotherhood among our people. It is the real practice of Christianity, and Kiwanis is doing its part.

In the absence of Russ Kennedy "Doc" Merrill wielded the gavel and took toll.

Next Tuesday will be a closed meeting with important business to be discussed so Ed Wiesendanger urges a full attendance.

Parsos Entertain San Franciscans

Mr. and Mrs. George Parso entertained a group of San Francisco friends at dinner Sunday.

A color scheme of red and green was used for the dinner table, which was centered with red carnations.

Mrs. Matilda Jakobson who had been a house guest the preceding week returned to San Francisco that day.

Battlefield Gives Up Secrets of the Past

There are certain kinds of armor which we read about but have never seen because up till now no examples were to be found in museums. Recently, however, many specimens have been found in two great pits outside the old city of Visby in the island of Gotland.

In 1361 Gotland was invaded by King Valdemar at the head of a powerful Danish army, and a desperate battle was fought before Visby. The valiant defence of the Gotlanders was all in vain, and Valdemar marched into the capital leaving nearly two thousand friends and foes dead on the field. They were buried hurriedly, with weapons still in the wounds, in two great graves which have not been disturbed for five and a half centuries.

Recently a Swedish archeologist has been excavating the pits, with their treasure of medieval armor and their poor bones marked by axes and arrows. The Swedish and Danish governments will erect a monument where so many men died gallantly because Valdemar wanted to plunder Gotland.

Pleasures of Table Dear to German Heart

With the possible exception of Chile, Argentina and Brazil, individual food consumption is greater in Germany than in any other country.

A Teuton is not content with one meal but must have a second one, about eleven o'clock. This is known by everybody from street car to banker. I have had conversations with outstanding financial and industrial figures interrupted at the sacred hour of the second breakfast by the arrival of a waiter with a tray of sandwiches or fruit.

Apparently the Germans never stop eating, which explains, perhaps, why there are so many German waiters. When they are not hard at food they are drinking coffee in the innumerable cafes.

If you look inside the leather brief case that nearly every German of high or low degree carries you will find that its principal content is a bundle of sausage sandwiches.—Isaac F. Marcosson in the Saturday Evening Post.

Chicago's Liberty Bell

The Columbian Liberty bell was cast at the foundry of the Meneely Bell company, Troy, N. Y., in 1893, and weighed 13,000 pounds, the diameter at its mouth being 88 inches and its height 75 inches. It was a duplicate of the new liberty bell that was placed in the tower of Independence hall, Philadelphia, in 1876, and was cast from the same molds. Each thousand pounds represented one of the thirteen original states. The exact cost of the bell is unknown, the records no longer being available. The bell was bought by a committee representing patriotic societies of which the late W. O. McDowell of Newark, N. J., was chairman. At the conclusion of the Chicago World's fair the bell was exhibited in various cities throughout the United States.

Much Older

They had been up to town to see the latest musical comedy, and were discussing its merits as they traveled homewards in the train.

"I think I liked the bad man best of all," declared the girl. "He was so very natural in everything—and oh, what lovely hair—so black and curly!"

The young man beside her cursed inwardly. He was very fair.

"What did you think of the big chorus of twenty-two?" he ventured, to change the subject.

"They were more than that," declared the girl decisively. "There wasn't one under thirty, in my opinion."—London Answers.

Quakers in World War

The selective service law in vogue during the World war provided exemption to "a member of a well recognized religious sect or organization, organized and existing on May 18, 1917, whose then existing creed or principles forbid its members to participate in war in any form, and whose religious convictions are against war or participation therein." This selective service law applied to Quakers as well as many other religious sects. However, there were numbers of Quakers who served in our active fighting forces.

Air's Temperature

The temperature of the air at a given place depends not only on the sunshine it is then getting but also on its own recent history. Wind from the south on a cloudy day may be as warm as wind from the north on a sunshiny day. This is particularly true when, as often happens, these winds have come a long way. Furthermore, when it is warm, humid air feels warmer than dry air at the same temperature. —Washington Star

Cleveland and Pittsburgh

Cleveland, Ohio, is named for Moses Cleaveland, the founder of the city, but the extra "a" has been eliminated. Pittsburgh honors the name of William Pitt. Its first name was Duquesne, given by the French, who had located a fort at the junction of the Allegheny and Monongahela rivers. After its capture by the English, in 1758, George Washington, then an officer of the British colonial troops, suggested that it be named Pittsburgh.

TILDEN LUMBER AND MILL CO.

High Grade Lumber and Mill Work

Located in San Jose, at 754 West San Carlos, phone Ballard 5600, the Tilden Lumber Co. is extensive in lumber, building materials and all kinds of mill work. Their prices are right and quality and service the best. This is a firm whose high-grade lumber has won wide popularity and patronage for the company at all times. It is a well known fact that there is no institution in the community that has greater favor with the public than this well known establishment. By reason of the fact that the management has had wide experience in every feature of this business and because of their comprehensive knowledge of every branch of the trade this establishment witnesses continued increase in the number of its patrons.

This company is known throughout this section as one of the leaders in the lumber business. The tremendous prestige of their immense volume of business, the wide experience of this most promintnt firm in this line, the practical knowledge that has won for them the recognition of the country at large and the patronage of thousands, all adds to the progress and prosperity of the community in which their large and modern establishment is located. There are few if any cities the size of this that have the advantage of the location in their midst of such an establishment as this well known firm maintains.

By reason of their modern facilities they are able to furnish excellent service with promptness and dispatch.

They are at all times pleased to be of practical assistance to the home-builders. They invite you to talk over ith them your building problems—their building experience enables them to turnish useful information and sound counsel.

The contractors and builders, the farmers and the people generally have come to know that they can depend on this well known firm for just about everything that there is in the lumber business. The reputation thatt hey established for stock of quality and for straightforward dealing is bringing thousands of dollars to town that would go to some other trade center were this establishment not located here. It may be truly said that this establishment is a valuable asset to the county, and in this edition which calls to mind our onward progress, we wish to direct your especial attention to their commendable activity as one of the distinct features of our business and industrial efficiency.

FREED'S $15 SHOP

Coats Suits Dresses

Do you ladies ever stop to think of the remarkable change that has developed in the ladies' ready to wear lines? Particularly in the dress section?

Could you have visualized two or three years ago that dresses of the type that Freed's sell for $9.75 and $15.00, could be possible? With all due credit to your judgment we doubt it very much.

Question No. 2

Do you recall what you paid for your dresses before Freed's ready to wear shop opened up? Try and recall if you can what you paid for your dresses and compare those prices with the type of merchandise that is being shown today for $9.75 and $15.00, at Freed's.

If you can concentrate for a moment on the above two questions we can lead you to the answer more readily.

So many people have been wondering how it is possible for Freed's to sell dresses and coats at the price they do. The answer is possibly more simple than one might imagine. Summed up, it is due merely to, a lot of experience, plus concentration, combined with quick sales and small profits, and, last, but not least, doing business on a highly specialized basis—and that—folks—is the story of the slogan that Freed's use:

"Up to the minute in style—down to the limit in price."

And—that also is the reason why most of you and your friends speak highly of Freed's values:

Freed's feel proud of the confidence that so many of you have placed in their offerings and would appreciate you being familiar with that fact. Mr. Freed's personal message is: "We will do everything within reason to merit your continued patronage."

48 South First, San Jose, located in the old Security Bank building. Dresses, $9.75 and $15.00, exclusively. Tailored suits, navy blue and tweed mixtures, $15.95. Coats, $15.00 up.

SPEEDOMETER SERVICE STATION

Robert M. Jackman

Located at 289 West Santa Clara street, San Jose. This firm is the factory representative for the following: Lovejoy Hydraulic Shock Absorber, A. C. Speedometer, A. C. Oil Filter, A. C. He has specialized in speedometers and has won an enviable reputation as an expert in this line. His patrons come not only from San Jose but from surrounding territory and in this review we are pleased to refer his service to all of our readers.

Out-of-town customers can send speedometers by parcel post and be assurred they will be returned 24 hours after being received at this station.

Bayberry Candles

In making bayberry candles the berries are collected from the bayberry bush and boiled in pails of water. The wax rises to the top, is skimmed off, and boiled again. Regular candle wicks are cut the desired length, attached to a rod dipped in warm water and then dipped into the pail of wax several times. Allow the wax to harden between times. The wax should be kept just warm enough to be in a liquid state.

Canada's Memorial

The singing tower of Ottawa is the Victory tower in the parliament buildings, which represents Canada's memorial to her 53,000 sons who died in the World war. A carillon comprising 53 bells has been placed in a memorial chamber from where recitals are given. The largest bell weighs 22,400 pounds and is 100 inches in diameter. The weight of the smallest bell is 10 pounds and the diameter is 8 inches.

Honey Formation

Whether bees make or gather honey is a disputed question. Honey is a sweet viscid liquid obtained by bees from the nectar of flowers, and after transportation to the hive in the crop of the insects, discharged by them into the cells prepared of wax. Whether this nectar undergoes any alteration within the crop of the bee is a question upon which authorities differ.

Campbell Downs Gilroy Cagers

Last Friday Coach Noddin's heavyweight basketball teams played two thrilling games with the invading Gilroy lads and came out of each fray the victor. The 130 game was really in little danger, as far as Campbell was concerned. The final score was 14 to 23 in favor of the local quint.

The unlimited game was even more exciting. For a while it looked like anybody's game. In fact, at the end of the fourth quarter the score stood 8 to 8. Five extra minutes of playing saw Campbell the winner of an 8 to 10 battle that had the excited fans standing. Lloyd Shank was hight point man with eight points to his credit.

Social Group Planned By Church Folks

Mrs. E. R. Kennedy and Mrs. G. E. Farley were hostessess Thursday afternoon at the home o f the former, to a group of 24 of the younger women of the Methodist church.

The formation of a social organization with some beneficial objective was discussed and tentative steps taken.

Miss Helen Lumb and Mrs. Marion Jenkins Howes sang interesting numbers and Miss Kittie Johnson exhibited some of the souvenirs she brought home from Europe last summer.

Dainty refreshments completed a pleasant afternoon.

Best Cure of All

The sum of the wisdom of all the ages on the subject of the common cold is that the way to avoid one is not to catch it.

Dr. A. F. McMillan

Violet Ray — Diaihermia Service

Located in San Jose at 14 East San Fernando, enjoys a large and well merited clientele from the city and surrounding territory, featuring the Violet Ray and Diaihermia service. The Violet Ray has proven a success in building up run down conditions of the body and other stomach disorders, etc. The Diaihermia is administered chiefly for nearly all pains in the chest, including colds, pleurisy, bronchial and lung trouble, and in cases of severe strains and sprains.

As we think of the afflictions that mankind is accidentally subjected to, we look at the smooth exterior of our body and wonder why.

But the more we know about ourselves the easier we can understand cause and effect.

In the brst stages of life the principal thing to be noticed is the brain. The brain being first must be the medium through which nature builds a complete body.

The baby is born with the organism working naturally. As long as nature can continue the reconstructive energy, the baby will grow and remain normal in every respect until like an old machine it will finally wear out. If we were once well and normal why are we sick now?

Dr. McMallan will prove to you that the so-called disease of the stomach, dyspepsia, headache, special nervous disease of the system, are due to interference with the constructive energy partially or wholly through pressure on the spinal nerves, causing disease wherever the nerves end.

By making an analysis of the spine he can detect any displacement and by simple adjustments can remove the pressure which causes disease. Good health naturally follows.

The human body is so constituted that it is unnatural for disease to creep in without cause. The nerve system is designed to give perfect health to all organs and to keep them repaired. If, through abnormal curvature, jolts, strains, falls or wrenches at some time in life, the movable bones of the spine are displaced even slightly they press on these nerves and obstruct he flow of energy. Weakness and disease result in the organs that these nerves supply.

Information and spinal analysis will cost you nothing. Then pass the word along to some suffering friends.

We wish to call our readers attention to this drugless physician, who has a reputation above reproach and who is one of our most successful chiropractors.

Tucker's Studio

High Class Photography

Located at 245 The Alameda, is the art center for this section and enjoys an excellent patronage from Campbell and all the surrounding territory.

The art of photography which was introduced by DaGuerre nearly a ctntury ago, has within the period developed from a mechanical trade to an art of science. As regards the photographer of today he must be a person of advanced ideas and thorough training so as to successfully compete with those who are now making this profession an art. As this studio is in charge of finished photographers who have made a life study of this interesting and artistic profession, they never let an opportunity pass to improve themselves.

They have in this studio, which may be termed this section's art center, the latest mechanical devices for the production of artistic photographs, and are admirably equipped to produce anything in the way of modern photography to please the most critical.

In the artistic production of children's pictures they have again well merited commendation, and have an excellent display including the photographs of many well-known people of this section.

This business is under the direction of later-day business men who appreciate the value of good service as a trade winner and they and their associates are always willing and anxious to accommodate their patrons.

Most Ancient Tree

The McNab cypress tree taken from an asphalt pit in California is thought to be more than forty thousand years old. The wood was preserved by the asphalt, which was thickly incrusted over it.

Oldest Free Library

The town library of Petersborough, N. H., formed through the efforts of Rev. Abiel Abbot in 1833, appears to have been the first free library which has continued to the present day.

Alcohol's Many Uses

Alcohol is the most important solvent, with the exception of water, dissolving many substances that water will not dissolve. It is also important in manufacturing many products and in the making of ether.

Necessary Arrangement

"He who seeks to agree with everybody," said Hi Ho, the sage of Chinatown, "must arrange, as far as possible, to speak with only one person at a time."—Washington Star.

Catalpa Victim of Moths

To be eaten alive is the fate of many of our catalpa trees. Tremendous ravages by the catalpa sphinx—the caterpillars or larvae of one of our somber hued hawk moths—have stripped their boughs of foliage and left them bare and unsightly, says the Nature Magazine. Sometimes the trees die from these severe defoliations, and occasionally entire plantations have been destroyed.

NOTICE

We are mailing each of our subscribers, unless paid in advance, a statement of account, as we are endeavoring to get our subscription list all paid in advance as magazines and other papers are doing. Even partial payments until accont is cleared will be greatly appreciated.

Musical Tea Will Be Given

A most interesting and lovely Musical Tea will be given Friday afternoon, February 8th at 2:30 P. M. in the Campbell Library Buildidg.

Ruth Deming, soprano, and Avenal Brandenburg Maggini, pianist and composer, are the artists presenting the program. These young women have been appearing together on programs together, delighting their audiences by their lovely musicianship and their charming personalities.

Their programs are made doubly appealing by the short informal talks which they give before each group.

Tea will be served following the program.

Mrs. Anna Sawyer will have as guests Friday a group of cousins from St. Paul, Nebraska, Mr. A. Paulman and daughter, Miss L. Bramer and Mrs. Ceres.

No Complete Leisure Even for Richest Man

Some one wrote the other day of a man who has leisure twenty-four hours every day.

There is, of course, no such man. Combine the hours a man needs for eating, sleeping, dressing, cleaning himself up, selecting the food and clothing he needs, cutting his finger and toe nails, looking after his fires, making duty calls on kin and neighbors and receiving their calls, cutting his coupons and checking up his bank account (providing he has all the money he wants, which no man ever had in history); grumbling about the nuisances in his neighborhood (a dog in the an annoying twenty-four hours every day; is it any wonder I devote some time, also, to cursing those persons who say a dog is man's best friend?) and he will have plenty to do. Ever so often he must take his automobile to be looked over; and once a month his bills must be checked up and paid. Then there is his income tax to pay; the call of the assessor; there are frequent visits to the dentist—a rich man supposed to have nothing to do may be the busiest man in town.—E. W. Howe's Monthly.

Working Principle of Explosive Engine Old

The basic idea of the explosive engine was conceived long before the of steam. In 1680 Huygens explosion motor which erated by discharging a owder to drive the air ylinder and raise the pis- that point, his engine relied force somewhat similar to the king principle of those today, but e useful work was to be done by the piston being forced down by the pressure of the atmosphere against it, thus lifting a weight or doing some other task. There is no record that this engine ever was operated. The steam engine of 1705 functioned on about the same plan, that is, steam was used to lift the weight of the piston, and after this was done, the atmospheric pressure was relied upon for the real work. After Huygens, almost 100 years passed before inventors caught the vision of rotary motion from their engines. His idea simply involved a piston and a cylinder.

Too Complicated

Mother was trying to teach little Sophia the meaning of fractions.

"Suppose," she asked, "I cut an apple into halves, how many pieces would I have?"

That was easy for Sophia. "Two," she answered.

"Now, if I cut the apple into quarters how many pieces would I have?"

Sophia thought a minute and, carefully counting on her fingers, gave the correct answer.

"Very good," said mother. "That's what fractions are."

Sophia was not satisfied, however. After a few moments she came back.

"If you cut an apple into tiny snips," she wanted to know, "how many pieces would there be?"

Mother thereupon decided to leave the lesson in fractions to teacher.

Kangaroo Superstitions

The Australian aborigines of certain tribes hold a number of superstitions connected with the kangaroo. These strange animals are believed to give warning of danger.

If a black fellow of these tribes going along saw an old man kangaroo hopping toward him it meant that an enemy was near and it was time to have his spear in readiness to strike. To dream that a number of 'roos were sitting around the camp was an omen of serious warning that danger beset the camp. In at least one tribe during their initiation period boys were not allowed to drink out of a waterhole unless through a hollowed 'roo bone.

Bacon and Shakespeare

There are three main points upon which the supposition that Bacon was in reality the author of Shakespeare's works are based: First, there are a few passages in Shakespeare's works which are similar to passages in Bacon's; second, the existence of certain supposed ciphers in plays which have been interpreted as cryptic signatures of Bacon; third, a single sentence written in a letter to Bacon by Sir Tobie Matthews at some date subsequent to January, 1621.

Puzzled

Billy, age four, had frequently made the acquaintance of a little switch, for Billie was slow in learning that he could not play in the street, that he could not run away and that bedtime came at a regular hour each day.

One day Billy, who had been thoughtfully gazing out the window, turned to his mother and asked: "Why do we call a tree a tree, when it is outdoors and a switch when it is in the house?"

True Wife a Servant

A true wife in her husband's house is his servant; it is in his heart that she is queen. Whatever of best he can conceive, it is her part to be; what is of highest he can hope, it is hers to promise; all that is dark in him she must purge into purity; all that is failing in him she must strengthen with truth; from her, through all the world's clamor, he must win his praise; in her, through all the world's warfare, he must find his peace.—Ruskin.

Some Original Ideas of American Builders

While siding and shingle exterior coverings for homes did not strictly originate in this country, being largely modifications of existing methods brought over by the early settler-artisans, the availability of the materials and suitability to native architectures give houses sheathed in siding or shingles a distinctly American flavor.

Houses covered with rough hewn siding boards, or clapboards, and crudely split shakes, or shingles, directly succeeded the first log cabins of the early colonists in this country. These materials have been refined by improved methods of manufacture into types which are individually appropriate to the variations of modern colonial architecture and to the architectures of other countries in American adaptations.

Cedar and pine and other durable native woods are used in modern manufacture of shingles and siding, which are frequently stained to enhance their appearance and resistance to weather. Wood siding and shingles have integral insulating value in themselves, increasing comfort and fuel economy in the winter and keeping the house cool in summer.

Wedding "Gifts" Once Held Legal Obligation

By a wedding custom common in the British isles until the early part of the Nineteenth century, the couple sent out invitations in which presents were solicited from those who accepted the bidding. More strange, these solicited gifts were regarded in the light of debts to be paid back by the couple. On the eve of the wedding the groom received at his house presents of money, cheese, butter and cattle from his friends, and the bride received similar gifts at her house from her friends. An account of each gift and the giver was kept in writing by the clerk of the wedding and the presents then became debts, which in some cases were transferrable or assignable to other persons. In other words these wedding gift-debts were repayable upon demand at any time, and upon refusal, recoverable at law.

It was in Scotland, however, where a wedding became a real business event. At their "penny weddings" of the last century the expense of the marriage was defrayed not by the couple or their friends, but by the guests all of whom paid something—or stayed away.—Detroit News.

No Food, No Bride

It is the custom at a Persian wedding that the groom first sees his bride in a mirror and then, having glanced at her face, returns to eat sweets and regale himself with his friends.

Mullah Nasr ed Din was married, beheld his bride in the mirror, returned to the guest chamber and discovered to his horror that the guests had eaten all the refreshments. He went out from the room in disgust and was caught as he was leaving the house by a back door.

Upon being asked why under heaven he was departing from his own wedding, he said: "Well, I'm going. The guests have eaten all the food. They may have the bride."—R. C. Hutchinson in Asia Magazine.

Immortal Musician

Jakob Ludwig Felix Mendelssohn-Bartholdy was the full name of the great composer. He was born at Hamburg, Germany, February 3, 1809, and died at Leipzig, November 4, 1847. He was the son of Abraham Mendelssohn, a banker, and the grandson of Moses Mendelssohn, the philosopher. Although he was born a Jew, he was baptized and brought up as a Protestant Christian, and was given the name Bartholdy. Mendelssohn is included among the great composers. He was an eminent conductor, a pianist of the highest rank, and a finished organist.

Compromise

A village bachelor, who had long been the object of many a spinster's ambitions, finally succumbed to the charms of a very willing widow; but on his wedding morning he failed to turn up.

The next day he called at his bride-to-be's house, looking rather sheepish.

"Jack dear," screamed the widow, who was well-nigh frantic with anxiety, "why didn't you come for me yesterday at noon?"

"We-e-ll," drawled the bachelor slowly, "I intended to, but it looked too much like rain to me."

Volcano's Temperature

In the volcano of Kilauea the temperature at the surface of the lava is in the neighborhood of 1,000 degrees Centigrade. Basalt, which is the molten rock in Kilauea and many other volcanoes, may melt at either higher or lower temperatures, depending on their composition. Thus the melting point of sandstone would be very high, probably in the neighborhood of 1,500 to 1,700 degrees Centigrade, depending on their purity.

Not Mixed Curse

Though the clouds of grasshoppers in the Tientsin-Peking section of China have added to the shortage of certain foods by devastating fields and devouring crops, they have themselves supplied many tables, the natives, rich and poor alike, esteeming them a great delicacy.—Living Age.

Poisonous Insects in Jungles of Bolivia

In the jungles along the River Beni, in Bolivia, are found some of the most malignant blood-sucking insects in the world.

Here lives the apasana, a bird-eating spider, attaining a length of from 8 to 10 inches, whose poisonous bite is sometimes fatal. It has a body resembling a ball of wool, with black hairs on its body and red ones on its legs. Its eyes are black and quick moving, with a most malevolent expression. It is very active and jumps about two feet at a single bound.

The palo santo ant, a fire ant, which lives in hollow-stemmed trees, is common here. A touch on this tree brings down a shower of the ants, whose bites feel like red-hot coals, the sting lasting for hours.

Other plagues are the zaputama, an almost invisible insect which lies in the grass, bites the legs of men and causes an almost intolerable itching; the guanaco, a bug which lives in the sand and whose bite is usually fatal; the baregui, a sand fly with a painful sting; sweat bees, which suck the perspiration from the hair; the anopheles or malaria-carrying mosquito, and wasps, ticks and jiggers.—New York Times.

Recalling Old Times and the Stereopticon

"What has become of the stereopticon lecturer," asked an old Washingtonian the other day.

"I remember when they used to be popular here in the 60's and crowds turned out to listen to them and to look at the slides.

"When he wanted a slide changed he would push a buzzer, clearly audible to the audience. Sometimes the operator of the machine would either be asleep or talking and failed to hear it.

"This necessitated a number of extra sharp buzzes on the button. We were patient with him, though, even if occasionally he was describing the Leaning Tower of Pisa while a picture of the ruins of the Coliseum was being shown on the screen.

"Then there was the era of illustrated songs, when a sour tenor sang maudlin songs about some girl who lived in a village by the sea. They were foolishly sentimental things, but we managed to get a kick out of it. Of course we didn't have the diversions in those days that occupy us now. Imagine our young generation attending a stereopticon performance." We can't.—Washington Star.

Just Her Way

All in one evening, while dancing with me, she said:

"The hall is so hot, I'm cooked."

"I'm crazy about dancing."

"I was petrified, when I saw him."

"That light is so glaring it makes me blind."

"Can't you shut the window? I'm frozen stiff."

"You make me sick."

"I nearly had a fit when he told me about that joke."

"The last partner I had drives me insane."

"I simply died laughing."

"I was perfectly dumb."

"I'm so tired, I'm just dead."

Then when I looked at her she seemed as alive and healthy as ever.

Of Course

In a plea for more careful use of English, Professor Jordan said:

"A great many American expressions are directly contrary to what we really mean, and the real reason why the English are sometimes so perplexed when an American tries to say something. The story of how we say 'lookout!' when we mean 'look in,' is a sample.

"The other day, on the beach, I heard a young girl ask: 'If I were drowning, would you help me?'

"'No,' said the young man,' evidently an Englishman, 'I'd endeavor to prevent you.'"

Famous Educator

William Holmes McGuffey was an American educator, born in Washington county, Pa., in 1800; graduated at Washington college, Pa., in 1825. He was a professor of ancient languages and later of moral philosophy in Miami university in 1836-39; president of the Ohio university in 1839-43; professor of moral philosophy in the University of Virginia from 1845 until his death in 1873. He compiled the so-called "Eclectic Series," and other school books.

No Atmosphere on Moon

The absence of atmosphere on the moon is proved by the fact that at the time of an eclipse of the sun the moon's limb is perfectly dark and sharp, with no apparent distortion of the sun due to refraction. Similarly, when a star is occulted by the moon it disappears suddenly and not somewhat gradually as it would if its light were being more and more extinguished by an atmosphere. There are other indications which lead to the same conclusions.

Work for Science

"Certain large tracts in the Rocky mountains have been set aside as 'wilderness,' to be preserved, untouched by recreation or commercialization, for scientific study." And why not also segregate tracts elsewhere in the land for exclusive scientific study of human narrow-mindedness? We could suggest a number of promising spots.—New Orleans Times-Picayune.

CAMPBELL

INTERURBAN PRESS

Published Every Thursday By
HARRY C. SMITH

Entered as second-class matter September 30, 1904, at the Postoffice at Campbell, California under the Act of Congress of March 3, 1879.

This new electric heater heats the air

A SEWING room, 9 feet by 10 feet or less, with a chilly temperature of 57 degrees can be kept at a cozy temperature of 68 degrees for three long hours for 13 cents.

An ordinary size bathroom on a cold spring morning, temperature 52 degrees, can be raised above 70 degrees.

Our special electric heating rates average 30% less than the lighting rates.

See this electric heater at your dealer's. Or phone or call at our office. We'll send you one to try in your home. We'll take it back if it doesn't meet with your enthusiastic approval.
